

Listing Corrections in Paragon

The accuracy of the MLS is a high priority for NNRMLS. That's why we want to know about any problems that you find with listings in the MLS. This option is to be used to notify the MLS of incorrect data or violations of MLS rules as they relate to the specific listing. This includes items such as noticing an obvious typographical error that occurred when the listing was input (such as a listing price of \$99,000,000 on a \$99,000 home), agent contact information in the Public Remarks (MLS or Extended). This process is confidential. NNRMLS will not reveal your identity to the listing agent.

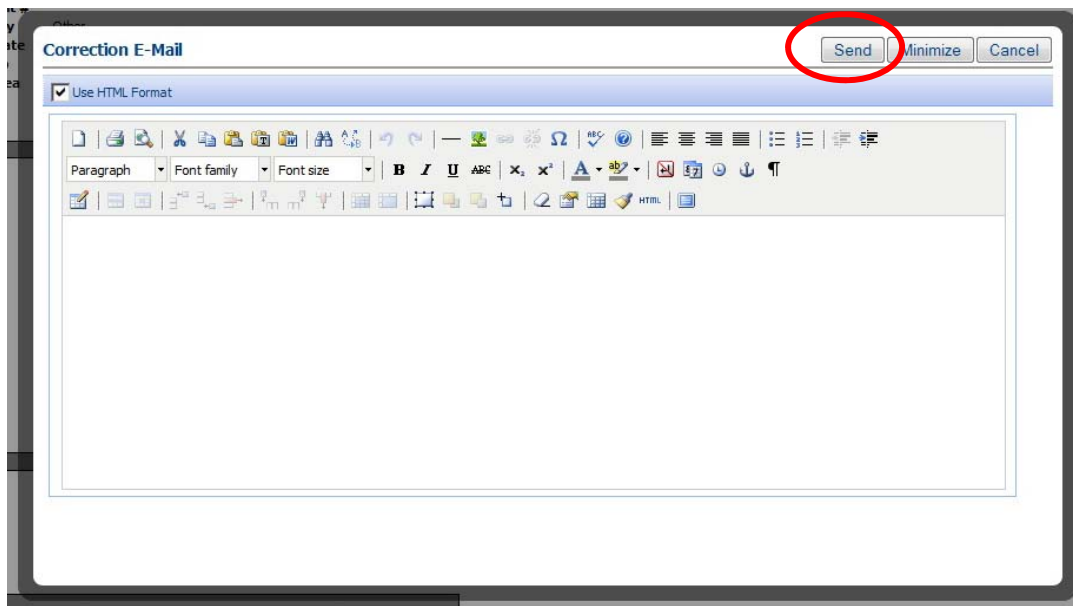

When you find an error on a listing, click the correction link above the listing detail.

The screenshot shows the Paragon MLS interface. At the top, there is a navigation bar with buttons for 'Checked', 'All', 'E-mail', 'Save', 'Print', 'Export', 'Customize', 'Correction' (circled in red), and 'Actions'. Below this is a section titled 'MLS All Fields' containing a property photo on the left and a table of listing details on the right. The table includes fields for MLS #, Status, Address, Unit #, City, State, Zip, Area, Rent, Class, and Type of Prop. A map on the right shows the location with a red pin and a distance of 0.6 miles. Below the table is a 'Property Information' section.

MLS #	90011497	Address	100 NE testing Annex
Status	WITHDRAWN	Unit #	100
Rent	\$15	City	Other
Class	RENTALS	State	NV
Type of Prop.	Site/Stick Built	Zip	89701
		Area	999 Out of Area

In the body of the resulting e-mail box, let us know what the error is on this listing. Finally, click the Send button to report it to the MLS.

The screenshot shows a 'Correction E-Mail' dialog box. At the top right, there are buttons for 'Send' (circled in red), 'Minimize', and 'Cancel'. Below these is a checkbox for 'Use HTML Format' which is checked. The main area of the dialog is a rich text editor with a toolbar containing various formatting options like bold, italic, underline, font color, background color, and text color. The text area is currently empty.

NNRMLS will verify your request and send the listing agent a correction request.

It's quick. It's Easy. It's Confidential
