

Minimum and Recommended Hardware and Software Requirements

The following "Minimum" PC configurations are the lowest configurations that are required to run the Paragon MLS Systems and Software. The "Recommended" PC configurations are suggested by Fidelity MLS for optimum performance of the System and Software. Fidelity MLS shall not be responsible for System performance when User equipment does not meet at least the "Recommended" configurations as specified below.

	Paragon 4		Desktop Paragon 4	
	Minimum	Recommended	Minimum	Recommended
Operating System	Windows 2000 or XP SP2, Vista	Windows XP SP2, Vista	Windows 2000 or XP SP2, Vista	Windows XP SP2, Vista

Internet Connection²	Dialup Internet Access 56kbps hardware error correcting modem	High Speed Internet Access: DSL Cable T-1	Dialup Internet Access 56kbps hardware error correcting modem	High Speed Internet Access: DSL Cable T-1
Internet Connection - Offices	56 kbps per user	Minimum 100kbps per user	Dialup Internet Access 56kbps hardware error correcting modem	High Speed Internet Access: DSL Cable T-1

- To calculate the required disk space: (Number of listings x 3k) + (Number of photos x 32k) + 150 MB for the Paragon Desktop program + 150 MB for the Microsoft© .NET framework (110 MB for framework + 40MB to install).
- Paragon MLS Desktop users will need their Internet Service Provider (ISP) login information (ID, password, and dial-up number) to complete the Paragon MLS Desktop installation. You may contact your ISP to obtain this information.
- When sharing an internet connection, it is important to maintain a large enough bandwidth to support multiple users. It is recommended that each user should be running at least 100 kbps.
